

Microsoft Teams — Organising a Class Meeting

Scheduling and Configuring an Online Class Meeting

Overview

Class meetings are scheduled directly inside your class team's channel so that every member of the team (including all students) automatically sees the meeting invite posted in the channel and can join with a single click. This guide walks through scheduling a meeting and setting up the recommended options for a classroom setting.

Part 1 — Scheduling the Meeting

Step 1: Open your class channel

Inside Microsoft Teams, open your class team and go to the channel you want to schedule the meeting in (e.g. "General").

Step 2: Open the meeting menu

Near the top-right of the channel, click the calendar/video icon with the dropdown arrow, then select "Schedule a meeting" (not "Meet now", which starts an instant call instead).

Step 3: Enter a title

In the "New meeting" window, type a clear title for the meeting — typically the class name, e.g. "XII A".

Step 4: Add required attendees

Click "Add required attendees" and search for and add the subject teachers or staff who need to be present. Add as many as needed.

Step 5: Set the date and time

Choose the start and end date/time for the meeting. Teams will show suggested time slots based on attendees' availability if any conflicts exist.

Step 6: Confirm the channel

Check that the meeting is linked to the correct team and channel (shown just below the date/time) so the invite posts automatically where your students will see it.

Part 2 — Meeting Options

Before sending the invite, review the Options panel on the right, or click "More options" to open the full Meeting options window for finer control.

Step 1: Set who can bypass the lobby

Under "Meeting access", set "Who can bypass the lobby" to "Only organizers and co-organizers". This means students and other attendees will wait in the lobby to be admitted, giving you control over who enters.

Step 2: Add co-organizers under Roles

Open the "Roles" section and add all subject teachers for that class as co-organizers under "Choose co-organizers". Co-organizers have the same capabilities as the meeting organizer, so this lets every subject teacher help manage the class meeting.

Step 3: Set who can present

Still under Roles, set "Who can present" to "Only organizers and co-organizers" so that students cannot share their screen or take over presenting without permission.

Step 4: Configure participation settings

Open the "Participation" section and set the following, recommended for a classroom meeting: turn OFF "Allow mic for attendees" (prevents background noise; you can unmute individual students as needed), keep "Allow camera for attendees" ON, turn OFF "Q&A" unless you plan to use it, and keep "Allow reactions" ON.

Step 5: Recording and transcription (optional)

If you want the meeting automatically recorded and transcribed, turn on "Record and transcribe automatically" from the Options panel or the "Recording & transcription" section.

Step 6: Apply the options

Click "Apply" at the bottom of the Meeting options window to save your settings and return to the New meeting screen.

Part 3 — Sending the Invite

Step 1: Review the details

Double check the title, attendees, date/time, and channel before sending.

Step 2: Click Send

Click the "Send" button at the top-right of the New meeting window. The meeting is now scheduled, and an announcement is automatically posted in the channel, showing the meeting title, date, and a "Join" button for every team member.

Quick Reference

- Channel → meeting icon dropdown → "Schedule a meeting" (not "Meet now").
- Meeting access → Who can bypass the lobby → Only organizers and co-organizers.
- Roles → add all subject teachers as co-organizers → Who can present → Only organizers and co-organizers.
- Participation → Mic OFF, Camera ON, Q&A OFF, Reactions ON (recommended for class meetings).
- Click Apply, then Send — the invite posts automatically in the channel for students to join.

Need Help?

If you run into any issues while scheduling a class meeting, please contact Jicku Philip, IT Department, at jicku.philip@icskwt.com or 55480070.
