

Microsoft Teams — Setting Up Your Class Team

Adding Students and Subjects to a Class Team

Overview

Each class team in Microsoft Teams is created and assigned by the school admin, with the class teacher added as an owner. Once a class teacher has been added to their respective class team, they are responsible for two follow-up tasks: adding all students of that class as members, and setting up subjects as channels within the team.

Before You Begin

- The admin has already created the class team (e.g. "ICS/Grade XII B") and added you as the class teacher with Owner permissions.
- You have signed in to Microsoft Teams using your school account.
- You have the list of admission numbers for the students in your class.

Part 1 — Finding Your Assigned Classes

Step 1: Open Microsoft Teams

Launch the Microsoft Teams application and sign in with your school account.

Step 2: Go to the Teams tab

In the left-hand sidebar, click "Teams". Under the "Classes" section, you will see all the class teams that the admin has assigned to you as a teacher — for example, IT Sam, ICS/Grade VI G, ICS Grade 6 Moral Science, ICS/Grade XII B, and ICS/Grade IX B.

Step 3: Open a class

Click on the class team you want to set up, such as "ICS/Grade XII B". This opens the team's General channel, where you can see posts and announcements for that class.

Part 2 — Adding Students as Members

Step 1: Open the Members tab

Inside your class team, click on "Members" at the top of the window (next to Channels, Pending requests, and Settings).

Step 2: Click "Add member"

Click the "+ Add member" button near the top-left of the Members page.

Step 3: Search by admission number

In the box that appears, type the admission number of the student you want to add. Teams will search and display the matching student's profile.

Step 4: Select and add

Click on the student's name from the search results to select them, then repeat for any additional students. Once you have selected everyone you want to add, click "Add" to confirm.

Step 5: Repeat for all students

Repeat this process (or add multiple admission numbers before clicking Add) until every student in the class has been added as a member of the team.

Note: Teachers and staff are typically added as Owners, while students are added as Members — this is the recommended structure shown in the Add Members dialog.

Part 3 — Adding Subjects as Channels

Step 1: Open the Channels tab

Inside your class team, click on "Channels" at the top of the window.

Step 2: Click "Add channel"

Click the "+ Add channel" button near the top of the Channels page.

Step 3: Name the subject

Enter the subject name (for example, "Mathematics" or "English") as the channel name, add a short description if needed, and choose the privacy setting for the channel.

Step 4: Create the channel

Click "Add" (or "Create") to finish. The subject will now appear as a channel under your class team, alongside the default "General" channel.

Step 5: Repeat for all subjects

Repeat this process for every subject taught in that class, so each subject has its own dedicated channel for posting materials, assignments, and updates.

Quick Reference

- Teams tab → Classes → shows every class team assigned to you by the admin.
- Members tab → Add member → search by admission number → add students.
- Channels tab → Add channel → create one channel per subject.
- Owners = teachers and staff · Members = students.

Need Help?

If you run into any issues while setting up your class team, please contact the VAM Coordinator, Jicku Philip, at jicku.philip@icskwt.com or 55480070.
