

How to Mark Student Attendance (LMS)

Step-by-step guide — LMS → Attendance Management

Overview

This guide walks through how a Class Teacher marks daily student attendance in the LMS portal of TrackMySchool, from opening LMS through to a saved confirmation. It covers opening Student Attendance, selecting the class/division, marking absentees, and saving.

Who this is for

Class Teachers only. Student attendance is marked exclusively by the class teacher for the students in their respective class.

How it works

- The Date field defaults automatically to the current day.
- By default, every student is marked Present (green toggle).
- If a student did not come to school, click their green toggle to switch it to Absent (it turns red).
- As soon as a student is marked Absent, a notification is instantly sent to that student's parent on their parent mobile application, informing them their child is absent.
- Once all absentees for the day are marked, click Save.

What you'll need

- An active TrackMySchool login (Teacher role)
- You must be the class teacher of record for the class you are marking attendance for
- The academic year selected (e.g., 2026-2027)

Step-by-Step Instructions

Step 1 — Open LMS

From the main TrackMySchool sidebar, click LMS. This opens the LMS portal in a new view, with its own Data Entry Area menu on the left.

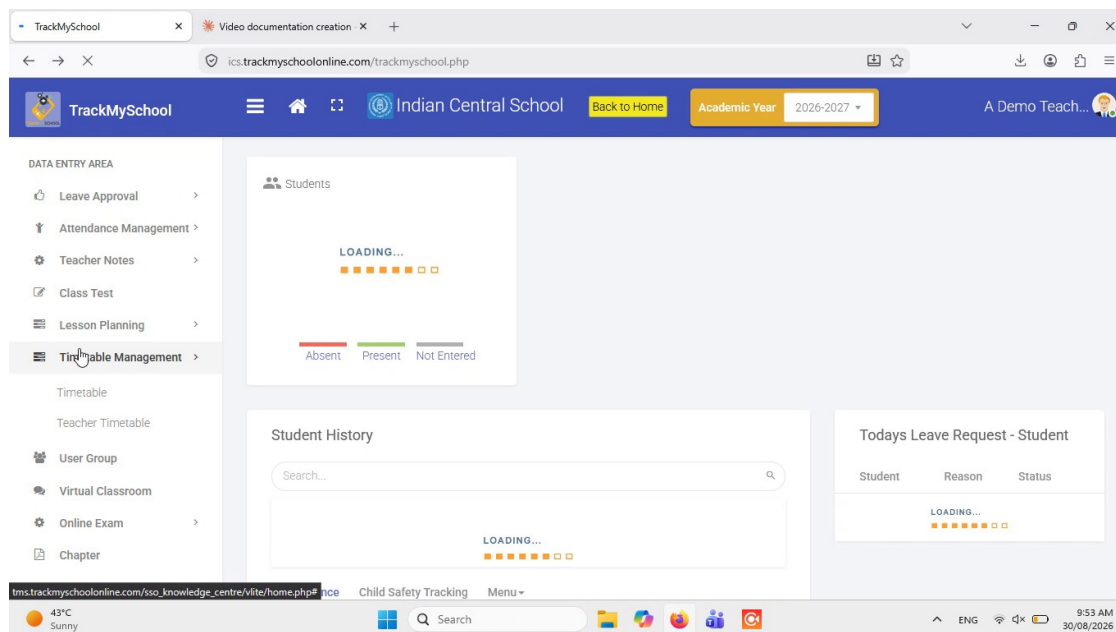

Figure 1. LMS portal with the Data Entry Area menu

Step 2 — LMS Dashboard

The LMS Dashboard shows a Students summary (Absent / Present / Not Entered), Student History, and Today's Leave Request panels, along with the Data Entry Area menu on the left.

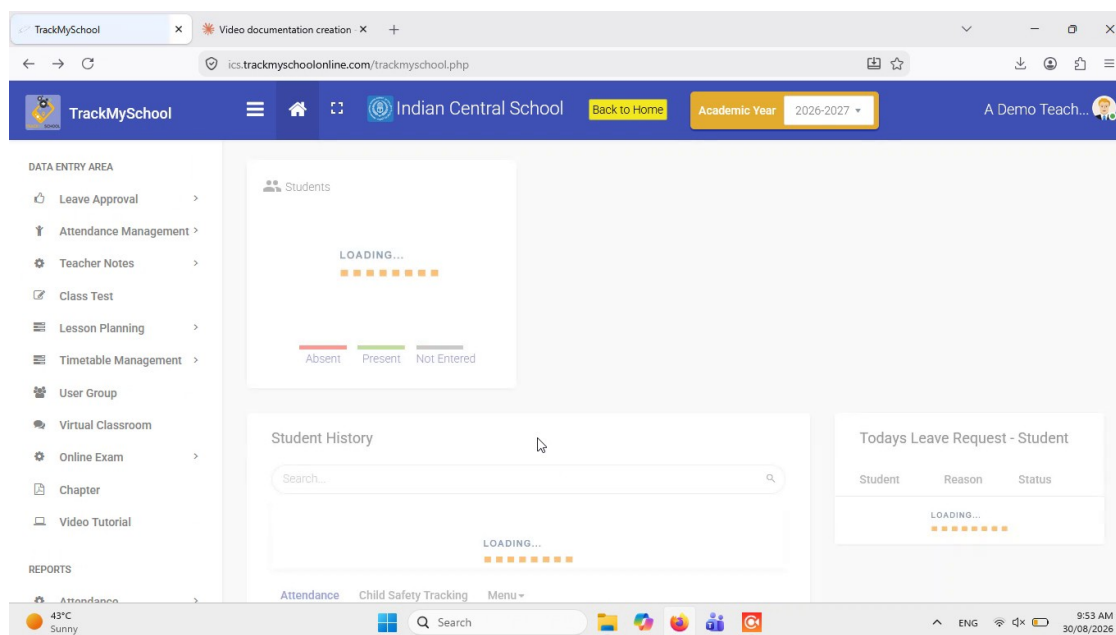

Figure 2. LMS Dashboard

Step 3 — Open Attendance Management → Student Attendance

In the Data Entry Area menu, click Attendance Management to expand it, then select Student Attendance.

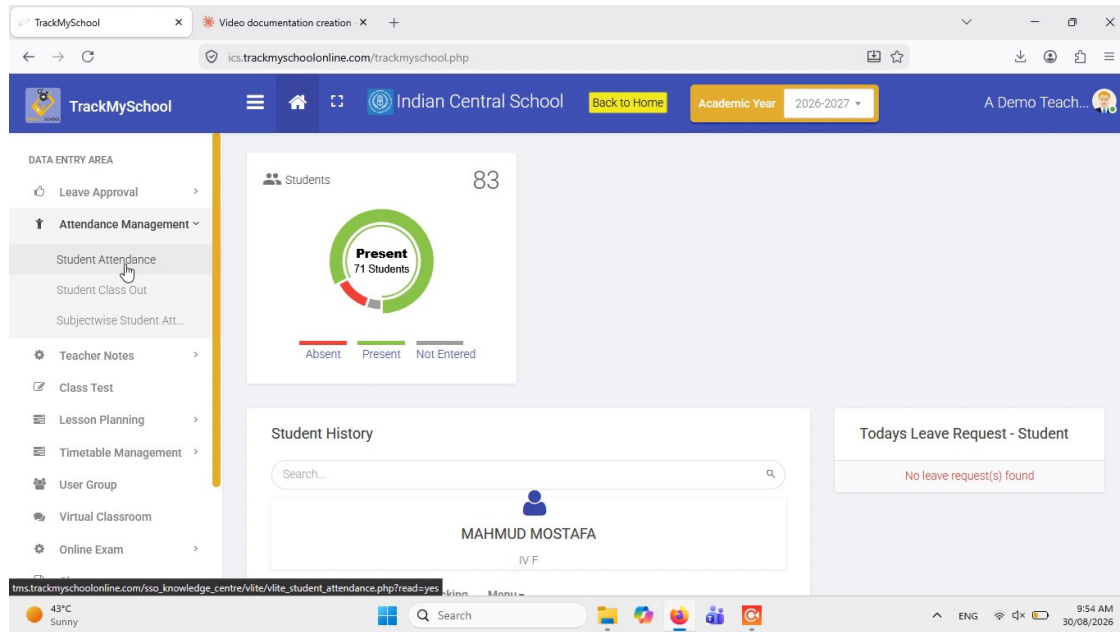

Figure 3. Attendance Management submenu showing Student Attendance

Step 4 — Select Class and Division

On the Student Attendance page, select your Class and Division. The Date field is already filled in automatically with the current day's date — you normally don't need to change it.

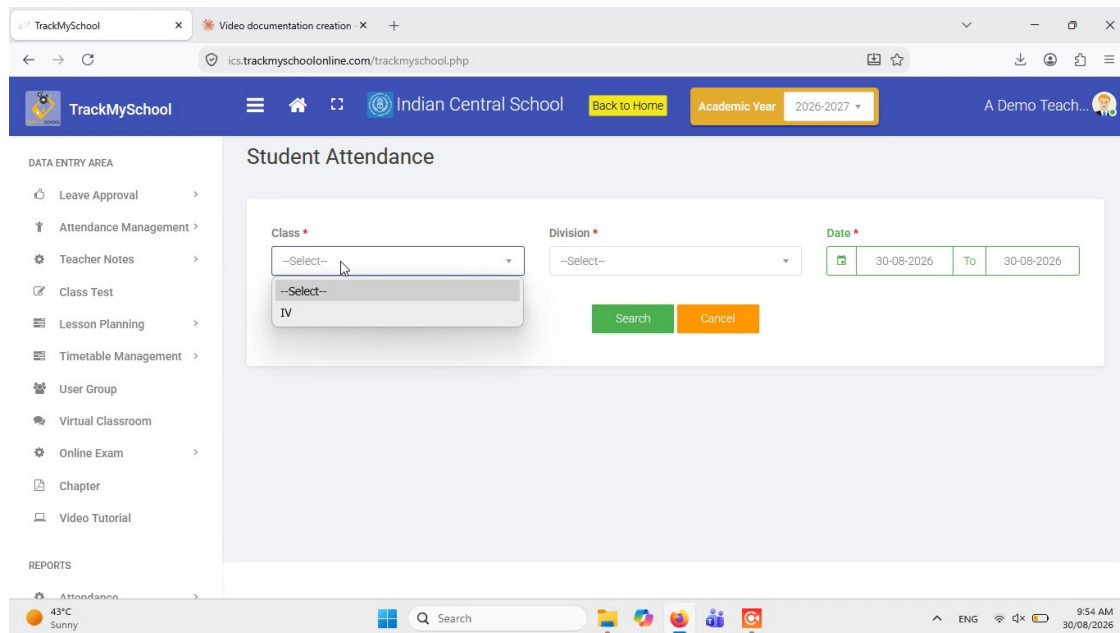

Figure 4. Class dropdown, with Date already defaulted to today

Step 5 — Search

With Class, Division, and Date set, click Search.

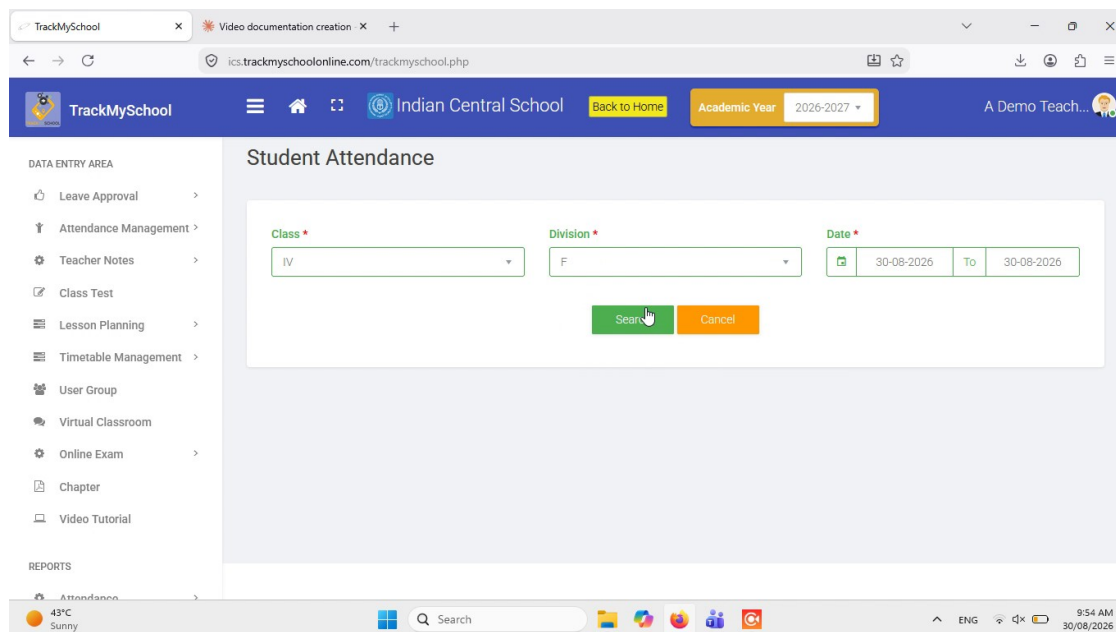

Figure 5. Class and Division selected, Date defaulted to the current day

Step 6 — Review the attendance legend

Above the student list, a Notes legend explains the toggle colors: Present, Absent, Attendance Not Entered, and Holiday/Non-Working Day.

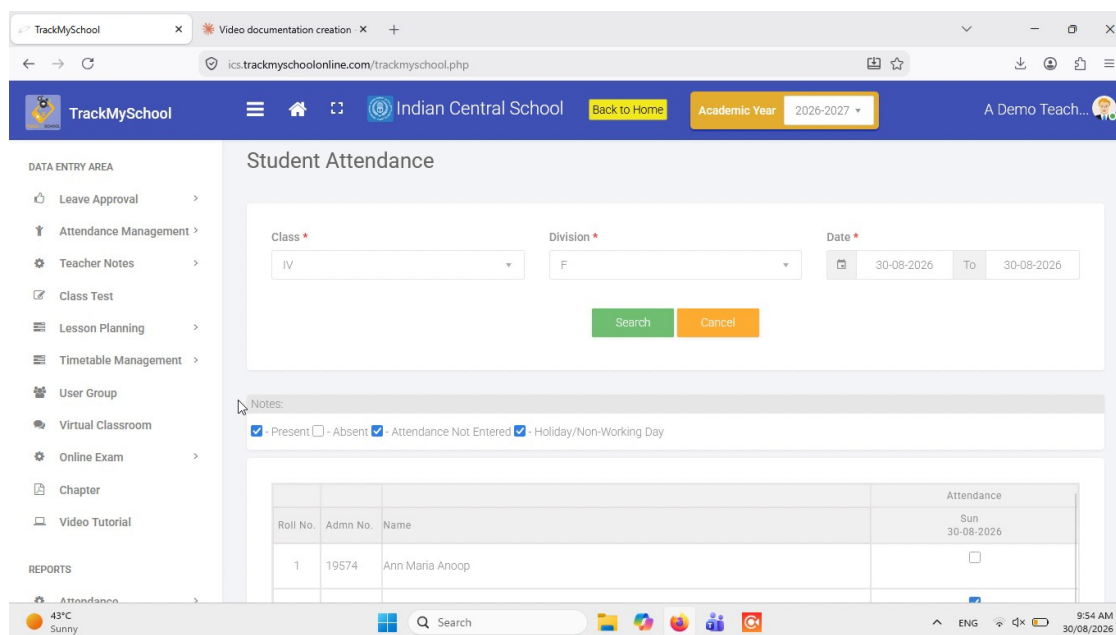

Figure 6. Attendance legend

Step 7 — Mark absentees

The class roster loads with every student's toggle set to green (Present) by default. For any student who did not come to school, click their green toggle to switch it to red (Absent). Leave all other students as-is (green/Present).

As soon as a student is toggled to Absent, a notification is sent instantly to that student's parent on their parent mobile application, letting them know their child has been marked absent.

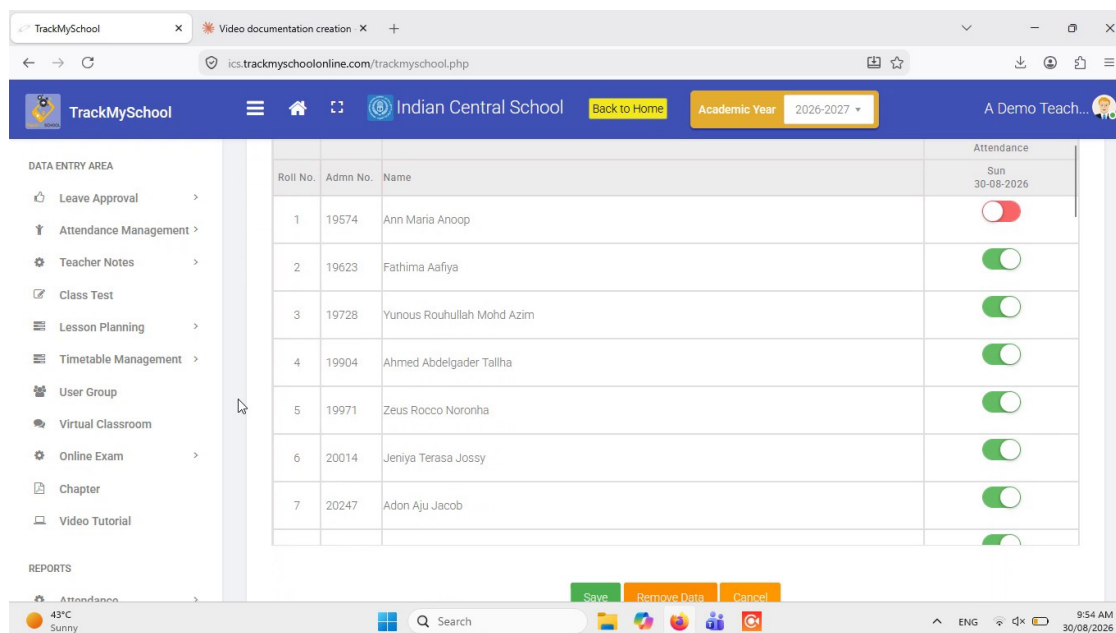

Figure 7. Student toggles — green for Present, red for Absent

Step 8 — Save the attendance

After marking all absentees for the day, scroll to the bottom of the list and click Save. Remove Data clears the entries, and Cancel discards changes without saving.

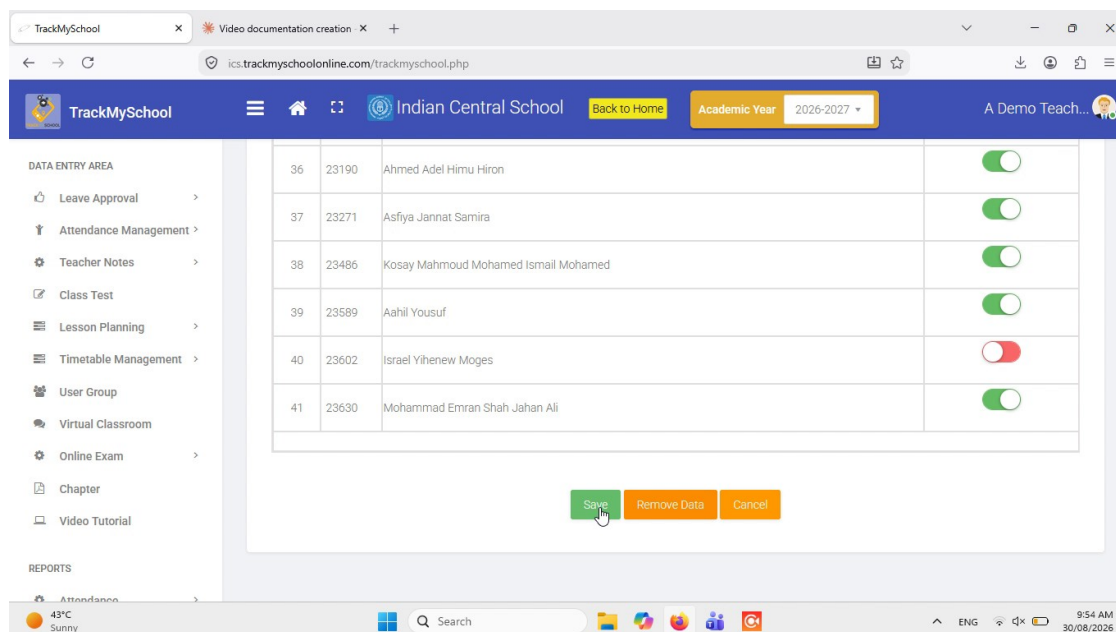

Figure 8. Save, Remove Data, and Cancel buttons at the bottom of the list

Step 9 — Confirm the attendance was saved

A confirmation dialog appears: “Attendance has been marked successfully.” Click OK to close it.

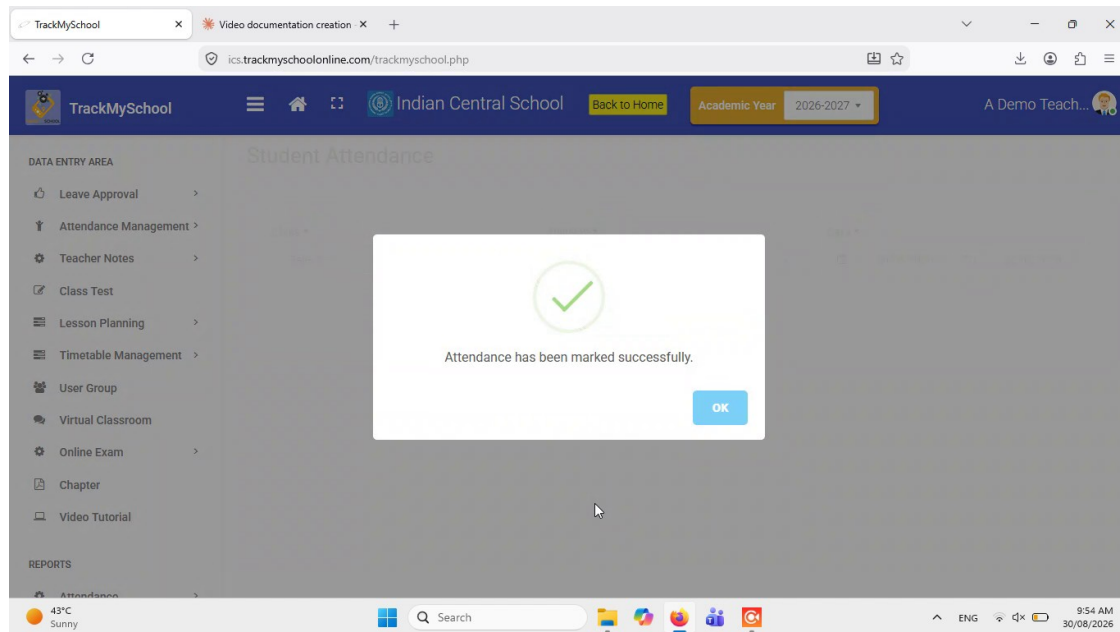

Figure 9. Success message after attendance is saved

Quick Reference Summary

- LMS → Attendance Management → Student Attendance
- Select Class and Division (Date is already set to today) → Search
- All students default to Present (green) — click the toggle to mark a student Absent (red)
- Marking a student Absent instantly notifies their parent via the parent mobile application
- Click Save → confirm the “Attendance has been marked successfully” message

Notes

- Only the class teacher of a class should mark attendance for that class.
- This should be done daily, since the Date field defaults to the current day each time the page is opened.
- Marking a student Absent triggers an instant notification to the parent on the parent mobile application — double-check before toggling a student, since the parent is notified immediately.
- The academic year selector (top right, e.g., 2026-2027) determines which year’s data is shown — confirm it’s set correctly before marking attendance.
- This guide is based on a screen recording of the workflow; menu labels and field names may vary slightly depending on your school’s configuration.
