

How to Update Your Timetable and Upload Teacher Notes

Step-by-step guide — LMS → Timetable Management & Teacher Notes

Overview

This guide covers two connected tasks in the LMS portal of TrackMySchool: updating your personal teaching timetable, and uploading Teacher Notes (Classwork, Homework, Project, Assignment, or Diary). The order matters: the timetable must be updated first, since it determines which classes appear when uploading Teacher Notes.

Who this is for

All teachers. Every teacher must update their own timetable, period by period, for every class they teach. Only after the timetable is updated can that teacher upload Teacher Notes — and only for the classes they have added to their timetable.

How it works

- Step 1: Update your timetable — go period by period, for every day, and either assign a Class/Division/Subject or mark the period as Free.
- Step 2: Once the timetable is saved, open Teacher Notes. The Class list here only shows the classes you added to your timetable — you cannot select a class you haven't been assigned to.
- In Teacher Notes, choose a Type (Classwork, Homework, Project, Assignment, or Diary), select the Class, Chapter, and Topic, optionally add an attachment, then click Send.

Part A — Updating Your Timetable

Step 1 — Open Timetable Management → Teacher Timetable

In the LMS Data Entry Area menu, click Timetable Management to expand it, then select Teacher Timetable.

Step 2 — Review your current timetable

This opens your Teacher Timetable in read-only view, showing a grid of periods (1st, 2nd, 3rd...) against the days of the week. Any period already assigned shows its Class, Division, and Subject. Click Edit to make changes.

Figure 2. Teacher Timetable (read-only view) with an Edit button

Step 3 — Fill in each period

In Edit mode, every period on every day shows Class, Division, and Subject dropdowns, plus a Free checkbox. Go through each period, one by one, for every class you teach, and select the Class, Division, and Subject for that period.

Figure 3. Edit mode — Class, Division, and Subject dropdowns for each period

Step 4 — Mark free periods

For any period where you have no class assigned, tick the Free checkbox instead of filling in Class/Division/Subject. The period will then simply display as Free.

Figure 4. Marking a period as Free

Step 5 — Resolve any scheduling conflicts

If you select a Class/Division that is already assigned to another teacher for that period, a warning appears naming the teacher and subject already assigned, and asks if you want to proceed anyway. Confirm only if the double-assignment is intentional.

Figure 5. Conflict warning when a class/division is already assigned elsewhere

Step 6 — Save the timetable

Once every period for every day has been filled in or marked Free, scroll to the bottom and click Update (Cancel discards your changes). A confirmation message, “Timetable has been updated successfully,” then appears.

Figure 6. Confirmation after the timetable is saved

Part B — Uploading Teacher Notes

Teacher Notes can only be uploaded after your timetable has been updated, and only for the classes you added to it.

Step 7 — Open Teacher Notes

In the Data Entry Area menu, click Teacher Notes to expand it, then select Teacher Notes (Library - T.Notes and T.notes Academic Library are related, separate sections).

Figure 7. Teacher Notes submenu

Step 8 — Review existing notes

The Teacher Notes page shows tabs for Classwork, Homework, Project, Assignment, and Diary, each listing previously uploaded notes. To add a new note, click the green + button in the bottom-right corner.

Figure 8. Teacher Notes page with Classwork/Homework/Project/Assignment/Diary tabs

Step 9 — Choose the note Type

On the Add Teacher Notes form, use the Type dropdown to choose what kind of note this is: Diary, Project, Assignment, Classwork, or Homework.

Figure 9. Type dropdown — Diary, Project, Assignment, Classwork, Homework

Step 10 — Select the Class

The Class list only shows the classes you added to your own timetable — in this example, only IV and V appear, because those are the only classes this teacher has on their timetable. Select the class you want to send the note to.

Figure 10. Class list limited to the teacher's own timetable classes

Step 11 — Select Division and Subject

After choosing a Class, the Division list updates to show the divisions you teach for that class. Select the Division, then choose the Subject from the dropdown.

Figure 11. Division and Subject selection

Step 12 — Select the Chapter

Use the Chapter dropdown to pick the relevant chapter or unit for the subject selected.

Figure 12. Chapter dropdown

Step 13 — Enter the Topic and description

In the Content Details section, enter a Title/Topic, and optionally add a Description using the rich text editor. You can also set a Scheduled Date if the note should appear on a specific date.

Figure 13. Content Details — Title/Topic, Description, Scheduled Date

Step 14 — Add an attachment (optional)

In the Attachments and Questions section, you can attach a file (allowed formats: png, jpg, jpeg, pdf, doc, docx, ppt, pptx, xls, xlsx; maximum 5 MB) by adding a Caption and browsing for the file, then clicking Add Attachments. A Video Attachment and Questions section below allows adding a video URL or file instead.

Figure 14. Attachments and Questions section

Step 15 — Send the note

Once everything is filled in, click Send to publish the note to the selected class. Save to Library saves it without sending, and Cancel discards the entry.

Figure 15. Send, Save to Library, and Cancel buttons

Quick Reference Summary

- Timetable Management → Teacher Timetable → Edit → fill in Class/Division/Subject or mark Free for every period → Update
- Teacher Notes → Teacher Notes → + → choose Type → select Class (only your timetable classes appear) → Division → Subject → Chapter → Topic/Description → optional attachment → Send

Notes

- The timetable must be completed first — Teacher Notes cannot be sent for a class that hasn't been added to your timetable.
- Every teacher updates their own timetable and their own Teacher Notes; this is not restricted to class teachers, unlike some of the other modules.
- Watch for the scheduling conflict warning when filling in the timetable — it means the class/division is already assigned to another teacher for that period.
- This guide is based on a screen recording of the workflow; menu labels and field names may vary slightly depending on your school's configuration.
