

Microsoft Teams — Setting Up Your Class Team

Adding Students and Subject Teachers to a Class Team

Overview

Each class team in Microsoft Teams is created and assigned by the school admin, with the class teacher added as an owner. Once a class teacher has been added to their respective class team, they are responsible for two follow-up tasks: adding all students of that class, and adding all the subject teachers.

Before You Begin

- The admin has already created the class team (e.g. "ICS/Grade XII B") and added you as the class teacher with Owner permissions.
- You have signed in to Microsoft Teams using your school account.
- You have the list of admission numbers for the students in your class.

Part 1 — Finding Your Assigned Classes

Step 1: Open Microsoft Teams

Launch the Microsoft Teams application and sign in with your school account.

Step 2: Go to the Teams tab

In the left-hand sidebar, click "Teams". Under the "Classes" section, you will see all the class teams that the admin has assigned you to as the class teacher.

Step 3: Open a class

Click on the class team you want to set up, such as "ICS/Grade XII B". This opens the team's General channel, where you can see posts and announcements for that class.

Part 2 — Adding Students as Members

Step 1: Open the Members tab

Inside your class team, click on "Members" at the top of the window (next to Channels, Pending requests, and Settings).

Step 2: Click "Add member"

Click the "+ Add member" button near the top-left of the Members page.

Step 3: Search by admission number

In the box that appears, type the admission number of the student you want to add. Teams will search and display the matching student's profile.

Step 4: Select and add

Click on the student's name from the search results to select them, then repeat for any additional students. Once you have selected everyone you want to add, click "Add" to confirm.

Step 5: Repeat for all students

Repeat this process (or add multiple admission numbers before clicking Add) until every student in the class has been added as a member of the team.

Note: Teachers and staff are typically added as Owners, while students are added as Members — this is the recommended structure shown in the Add Members dialog.

Part 3 — Adding Subject Teachers

Step 1: Open the Members tab

Inside your class team, click on "Members" at the top of the window (the same tab used for adding students).

Step 2: Click "Add member"

Click the "+ Add member" button near the top-left of the Members page.

Step 3: Search for the subject teacher

In the box that appears, type the name of the subject teacher you want to add. Teams will search and display the matching profile.

Step 4: Select and add

Click on the teacher's name from the search results to select them, then repeat for any additional subject teachers. Once you have selected everyone you want to add, click "Add" to confirm.

Step 5: Repeat for all subject teachers

Repeat this process until every subject teacher for that class has been added to the team.

Step 6: Make each subject teacher an Owner

Back on the Members page, find each subject teacher you just added under "Members and guests". Click the role dropdown next to their name (it will show "Member") and change it to "Owner". This gives them the same management rights as the class teacher for that team.

Note: All subject teachers must be made Owners after being added — only Owners have full management rights over the team.

Quick Reference

- Teams tab → Classes → shows every class team assigned to you by the admin.
- Members tab → Add member → search by admission number → add students.
- Members tab → Add member → search by name → add subject teachers, then change their role to Owner.
- Owners = teachers and staff · Members = students.
